XF-3200 (TMP)

XF-3200(TMP) could be used as a calcium carbonate inhibitor and a multifunctional formulation support agent in industrial water systems and other related applications.

Abbreviation	TMP
Chemical Name	Maleic Acid Terpolymer
Physical Form	Aqueous Solution

Typical Properties

Characteristics	Specification
Appearance:	Yellow to amber liquid
Odour	Slight
Solids content, % w/w	45.0 – 50.0
Specific gravity @ 20 °C, g/cm ³	1.16 – 1.20
pH, undiluted @ 25 °C	≤ 2.0
Viscosity @ 25 °C	10.0 – 30.0 cps

Packaging and Storage

210L HDPE Drum; 1000L IBC(tote); Isotank
